I hereby certify that this correspondence is being transmitted to the U.S. Patent and Trademark Office via the Office's electronic filing system on <u>April 12, 2010</u>

Anne Arlauskas /anne arlauskas/ (Printed Name) (Signature)

DECLARATION UNDER 37 C.F.R. §1.132

- I, Dirk Verdoes, do hereby declare as follows:
- 1. I am the inventor named in U.S. patent application serial number 10/574,887.
- 2. I am familiar with an office action that issued on January 11, 2010, concerning the above-identified application.
- 3. I understand from the office action that the Examiner believes the instant invention is not patentable over WO 04/11309 to Verdoes *et al*.

Applicant: Verdoes et al.

Serial No: 10/574,887 Filed: March 12, 2007

Our Docket: 294-247 PCT/US

Page 2

4. Verdoes *et al.*, is limited to embodiments wherein the filter pore size is smaller than

the seed particle size. In particular, the requirement that "the filter has such a pore size that

the liquid does and the seed material does not permeate through the membrane (emphasis

added)" indicates that the filter pore size must be smaller than the seed particle size.

Moreover, it teaches the skilled person that the filter pore size and the seed particle size must

be considered in combination.

5. A skilled artisan reading Verdoes et al. would understand that the ranges mentioned

on page 6, lines 27-35, cannot be freely combined.

6. At the time of invention of Verdoes *et al.*, skilled artisans (including the inventors)

were under the assumption that small particles could only be separated by using a filter with

pore size smaller than the particles.

7. I unexpectedly discovered, as disclosed in the instant application, that open filters

having a filter pore size larger than the seed particles size are nevertheless capable of

blocking the seed particles.

I hereby declare that all statements made herein of my knowledge are true and that all

statements made on information and belief are believed to be true. Further, I hereby declare

that these statements were made with the knowledge that willful false statements and the like

so made are punishable by fine or imprisonment or both under Section 1001 of Title 18 of the

United States code, and that such willful false statements may jeopardize the validity of the

application of any patent issued thereon.

Dated:	Signed:	
	Dirk Verdoes
